PROFESSIONAL SUMMARY

Software Developer specializing in Flutter, Laravel, and React.js with hands-on experience developing mobile and web applications. Experienced in REST API integration, AI-powered applications, database management, and mentoring vocational high school students through the IDN Teaching Program. Passionate about building scalable, user-friendly applications and continuously learning modern software technologies.

EXPERIENCE

IDN Teaching - May 2026

SMK Al-Irsyad Al-Islamiyah, Cirebon

Currently serving as an IDN Teaching instructor at SMK Informatika Al-Irsyad Al-Islamiyah, Cirebon, teaching Laravel web development to vocational high school students. Guiding students through the development of a Mini Stock Manager web application, covering database design, CRUD operations, authentication, MVC architecture, and responsive user interface development. Mentoring students in applying software development best practices, debugging techniques, and collaborative project workflows to build real-world web applications.

IDN Teaching - May 2024

SMAN 1 Cikarang Selatan

Introduced students to web development concepts using HTML and CSS. Mentored students in developing a Company Profile website project from start to finish through hands-on coding sessions using Visual Studio Code (VS Code). Helped students understand UI layout, styling, and clean code structure.

IDN Teaching - April 2024

SMA Al-Muttaqin, Tasik Malaya

Taught students front-end web development fundamentals using HTML and CSS. Guided students in building a Company Profile website as the final project while using Visual Studio Code (VS Code) as the main development tool. Explained webpage structure, styling, layouting, and responsive design basics, while also assisting students in debugging code and improving website appearance.

SKILLS

- | | | | |
|-----------|------------|----------------|------------|
| • Git | • Php | • Java Script | • Dart |
| • Github | • Flutter | • Tailwind Css | • MySql |
| • Vs Code | • Laravel | • Css | • SQLite |
| • Postman | • React Js | • Html | • Firebase |

PROJECT

Software Developer - April 2026

Schedule Generator App With Ai

- Developed an AI-driven application designed to automate daily and weekly scheduling based on user priorities, deadlines, and preferences.
- Integrated [Specify AI Tool, e.g., OpenAI API / Gemini API] to provide intelligent time-blocking suggestions, optimizing user productivity by [X]%.
- Built a responsive and intuitive user interface using [Specify Tech Stack, e.g., React / Flutter / Swift] to ensure a seamless cross-platform experience.

Software Developer – March 2026 to April 2026

Qr-Scanner App

- Developed amobile QR code applicationusingFlutter & Dartfor generating and scanning QR codes with a clean and responsive user interface.
- Implemented core features includingQR code scanner, QR generator, history management, and local data storage.
- Designed intuitive UI/UX to improve usability and provide seamless navigation across features.

Software Developer – March 2026 to April 2026

Al-Quran App

- Project Overview:Developed a high-performance Android application that provides a digital platform for reading and listening to the Al-Quran, featuring a clean and modern user interface.
- Key Responsibilities & Achievements:
- RESTful API Integration:Successfully integrated theQuran APIto dynamically fetch and display 114 Surahs, including verse text, translations, and metadata.
- Advanced Data Handling:Implemented efficientJSON parsingto manage complex data structures and ensure smooth content delivery across the app.
- Media Streaming:Integrated anaudio playback systemthat allows users to stream high-quality recitations from various Qaris directly via API endpoints.
- Local Data Persistence:Developed a"Last Read" featureusing local storage (SQLite/Room) to track user progress and provide a seamless personalized experience.

Certificates

- Learn Basic Ai
- Learn Basic Pemrograman Web
- Learn The Basics Of Cloud And Gen Ai
- Learn Data Science Applications With Microsoft Fabric
- Coding For Data
- Vibe Coding
- Generative Ai In Practice
- Basics Of Sql Statements & Indexes
- Sql (Intermediate)
- Building Generative AI Applications With Microsoft Azure

EDUCATION

IDN Boarding School
